Characteristics of the components:

The formulation of Sonriza Pro Salut was created with the aim of normalizing the functional state of the nervous system in people who are in conditions of increased mental and physical stress, accompanied by stress and exhaustion of the body, with sleep disturbances, in order to reduce the risk of the occurrence and development of cardiovascular vascular and neurological diseases, improvement of the general condition of the body.

Hawthorn has a cardiotonic effect, to a certain extent enhances the contractile function of the myocardium and reduces its excitability, improves blood circulation in the vessels of the heart and brain vessels, prevents cardiac arrhythmia, has sedative properties, normalizes blood pressure.

Passionflower has calming properties, improves sleep, normalizes blood pressure, helps to thin the blood and normalizes the work of the heart and blood vessels, improves memory, and has an antidepressant effect.

Hops have a sedative effect on the central nervous system.

Medicinal valerian has a calming effect on the central nervous system, improves the activity of the cardiovascular system, normalizes heart rhythm, and lowers blood pressure.

Motherwort heart stabilizes the heart rhythm and strengthens the myocardium, has an antispasmodic effect, lowers blood pressure, and helps normalize the level of cholesterol in the blood.

Melissa officinalis has a hypotensive, sedative effect, helps to slow down heart rate, has moderate diuretic properties

Recommendations for use: can be recommended as an additional source of biologically active substances in case of increased psycho-emotional stress. Contributes to the normalization of the functioning of the cardiovascular system, prevents the development of arrhythmia, contributes to a moderate decrease in blood pressure, normalization of sleep, and increases work capacity. It has mild sedative properties.
